Do you want to enter download mode now (y/n)? [n] y

System re-confirm  
and re-boot

Boot loader V4.12

Mem 16b 16M

Loading s/w upgrade utility.....

\*\* Internet Telephony Gateway TFTP Loader Ver 4.10 \*\*

EITGLoader>start

Console will switch to  
download mode, type 'start' to  
start the download operation

## Start Download

IP address of the TFTP server? [192.168.0.2] 211.20.96.3

Key-in TFTP server  
IP address

File name? it4a320.imz

Key-in firmware  
image file name

Starting download file: it4a320.imz

Start download

Download complete, file size = 921028

Download successfully

Application code downloaded successfully

Do you want to write downloaded image to flash EEPROM (y/n)? [y]

Write image file to  
EEPROM

Press <Enter> to start flash EEPROM programming

Flash EPROM programming on-going, BE CERTAIN NOT TO TURN POWER OFF...

Flash sector no. 4 write done

Flash sector no. 5 write done

Flash sector no. 6 write done

Flash sector no. 7 write done

Writing image file  
to EEPROM, DO  
NOT power off

## Writing Image File to EEPROM

Flash sector no. 8 write done

Flash sector no. 9 write done

Flash sector no. 10 write done

Flash sector no. 11 write done

Flash sector no. 12 write done

Flash sector no. 13 write done

Flash sector no. 14 write done

Flash sector no. 15 write done

Flash sector no. 16 write done

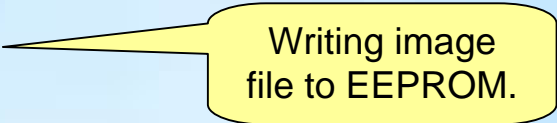

Flash sector no. 17 write done

Flash sector no. 18 write done

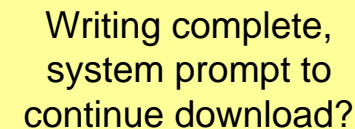

Flash EEPROM programming completed

All sectors programmed successfully

Download another file (y/n)? [n] n

Writing image  
file to EEPROM.

Writing complete,  
system prompt to  
continue download?

## Finish and Quit

EITGLoader>quit

Quit download  
mode

Do you want to restart the system now (y/n)? [n] y-?

System confirm  
re-boot

Boot loader V4.12

Mem 16b 16M

Testing memory 8M.....

Loading application code.....

\*\*\*\*\* Internet Telephony Gateway (ACC) Version 3.20 \*\*\*\*\*

\*\*\*\*\* Hardware Configuration \*\*\*\*\*

Firmware upgraded  
after re-boot

Flash: type-Am29LV160DB 32 sectors 64 KB/sector
