OVERVIEW

The UKS8104-D4T, slim desktop combo PS/2 and USB KVM Switch, is a 4-port electronic switching devices for controlling four PCs from one keyboard, one mouse, and one VGA monitor. The KVM switch has complete keyboard and mouse emulation for simultaneous PCs boot-up process. To switch between PCs can be accomplished in two ways: through keyboard "hot Key" commands or by using the convenient "Select Push Buttons" control.

The UKS8104-D4T offers dual interface connectivity support for both USB and PS/2 interface on both console side and computer side. This combo KVM switch features the slim USB PS/2 KVM cabling technology to save you troubles in changing KVM cables for USB or PS/2 interface. It just use the same slim KVM cables to connect to either USB or PS/2 interface by removal/addition of a simple USB-to-PS/2 converter. You don't have to prepare different KVM cables while changing the connection interface.

Furthermore, it enhanced hot-plugging capability allows you to plug off and on the KVM cabling without powering down KVM Switch or power down a whole rack of servers or computers, especially convenient when you are working on a server rack configuration. The KVM switch also provides the best convenience for users who have multiple desktop computers and/or notebooks; or power users who need control multiple servers from one console. It saves your equipment cost, time, space, power, and provides the best convenience of operation
