- Two Audio and Microphone Cables
- One User's Manual

#### OVERVIEW

The UKS8202-U2B compact size USB KVM Switch with Audio and Mic provides Audio and Microphone switching function for SOHO and office desktop multimedia application. And it allows you to access, control, boot and reboot two USB-enabled multimedia computers using only one keyboard, mouse, VGA monitor and optional speaker set and microphone.

The audio and microphone switching function of UKS8202-U2B allows you to leverage the multimedia systems on each of your two computers. You can monitor the audio/mic input/output of each computer without plugging on and off the audio/mic cables. And it takes only one set of speaker and microphone instead of one set for each computer.

Furthermore, it offers you user-programmable simultaneous / independent PC and Audio/mic switching function for flexible multimedia and KVM Switching operation.

The KVM switch provides the best convenience for users who have multiple desktop computers and/or notebooks; or power users who need control multiple servers from one console. It saves your equipment cost, time, space, power, and provides the best convenience of operation.

The UKS8202-U2B also provides a Win-based Switching Software that shows you the current active PC and allows you to select PC as well as configure keyboard hotkeys. It appears as an icon on the system tray of your Window desktop, and will change its number icon upon switching to show the active PC port. Using this small client software, it will give KVM users utmost convenience and control.
